

Cybersecurity Tabletop Simulation Service

Test Your Incident Response Readiness

Creating an Incident Response plan is a key component of any holistic cybersecurity strategy. A well-crafted Incident Response plan can help keep a cyberattack contained as well as ensure clinical workflows aren't impacted. Testing your Incident Response plan will quickly demonstrate how your organization responds in the event of an attack, allowing you to uncover gaps and areas for improvement.

Join the many healthcare organizations that have participated in our expert-led Cybersecurity Tabletop Simulations and make sure your Incident Response plan can withstand today's cyberattacks while patient care remains a priority.

By completing a Cybersecurity Tabletop Simulation, you'll be able to evaluate your organization's readiness, determine the tipping point when the response may become a recovery, and uncover key learnings in order to create or update your Incident Response plan.

"The CloudWave cybersecurity team's ability to bring real-life scenarios into a tabletop drill is the best that I have personally seen. The tabletop drill is a true learning experience. They give excellent feedback so that the team improves with each tabletop drill. The CloudWave team is smart, helpful, and honest. I couldn't be happier with my experience with the CloudWave cybersecurity team."

— Mitze Amoroso, SVP/CIO
Archcare

Evaluate Readiness

- See how well your Incident Response team knows and understands your plan
- Determine how long it takes your team to act and contain the cyber attack
- Test your Incident Response plan each step of the way

Discover Your Tipping Points

- Learn at which point your team's actions are no longer effective
- Determine at which point the response becomes a recovery

Uncover Key Learnings

- Identify what went wrong
- Identify what could have been done better
- Identify actions needed for improvement

Who Should Participate?

- Your IT team
- Your Rapid Response team
- Your Clinical team
- Your C-suite/Executive team

The Process

CloudWave's Tabletop Simulations are created from the perspective of the cyber attacker. We'll use modern day attack examples to put you and your team in a real-life cyber attack situation. Topics, duration, and scenarios can be customized to fit your needs.

About CloudWave

CloudWave is a full-service cybersecurity and cloud services provider exclusively for healthcare. Protecting over 300 hospitals and health systems, CloudWave delivers end-to-end solutions combining secure hosting, IT operations, and 24/7 threat detection. Services include managed security, risk and compliance, disaster recovery, and cloud optimization—all with a healthcare-first approach. Powered by AI-driven security operations and supported by U.S.-based Network and Cybersecurity Tactical Operations Centers, CloudWave provides healthcare organizations with a cyber-ready foundation for safe, uninterrupted patient care.
